## WHAT WE DO

Recruitment and placement of administrative, office support and human resources personnel for federal departments and agencies. We source, screen and place resources against a departmental requirement and carry the administration that comes with the placement: timesheets recording actual time worked, invoicing, security and contractor identification obligations, records retention and quarterly usage reporting.

## HOW WE WORK

- We respond inside the window. Temporary Help Services competitions run on 48 hours for lowest price and 96 hours for right-fit, and we are structured to meet those.
- We propose resources we can actually deliver. We do not submit a resource we have not spoken to and verified.
- We price to the median band rather than to the floor, because a rate that cannot sustain a placement does not survive the assignment.
- A small, vetted team. You deal with the people doing the work, not an account layer relaying messages.
- Canadian owned and woman owned small business, self attested as a diverse supplier under the Temporary Help Services arrangement.

## PAST PERFORMANCE AND VERIFICATION

Both supply arrangements were awarded following reference substantiation carried out directly by Public Services and Procurement Canada. PSPC contacted our project references in July 2026 and verified our experience against every stream, category and level applied for. All were found compliant and granted.

Selected engagements and further detail on any category are available on request.
